Lab 2: Jira Bug Tracking Project Report

Course: Software Engineering Lab 2 • Problem Statement: Book Club Reading Challenge & Discussion Portal

1. Bug Tracker Space & Defect Backlog View

Project: BugTracker_BookClub

Description: Created a dedicated Bug Tracking workspace in Jira named BugTracker_BookClub for the Book Club Reading Challenge & Discussion Portal. Reported defects across core discussion, reading progress, moderation, and monthly voting modules.

The screenshot shows the Jira interface for the 'BugTracker_BookClub' space. The top navigation bar includes tabs for Summary, List (selected), Board, Backlog, Development, Forms, Timeline, Docs, and Reports. Below the navigation bar, there's a search bar and a filter button. The main content area displays a list of four bugs, each with a key, summary, assignee, reporter, priority, and status. The bugs are all assigned to 'Unassigned' and reported by 'Sushruth Sukesh'. The status for all bugs is 'To Do'.

Work	Assignee	Reporter	Priority	Status	
☐ BBBC-1 Spoiler content visible in search preview	Unassigned	SS Sushruth Sukesh	Medium	To Do	Ur
☐ BBBC-2 Negative page count accepted in reading pro...	Unassigned	SS Sushruth Sukesh	Medium	To Do	Ur
☐ BBBC-3 Regular member can access discussion mod...	Unassigned	SS Sushruth Sukesh	Medium	To Do	Ur
☐ BBBC-4 Duplicate vote accepted after session refresh	Unassigned	SS Sushruth Sukesh	Medium	To Do	Ur

Defect Inventory Summary

Issue Key	Bug Summary	Component	Priority	Status
BTBSC-1	Spoiler content visible in search preview	Discussion / Spoiler	Medium	To Do
BTBSC-2	Negative page count accepted in reading progress	Reading Progress	Medium	To Do
BTBSC-3	Regular member can access discussion moderation controls	Discussion Moderation	Medium	To Do
BTBSC-4	Duplicate vote accepted after session refresh	Monthly Poll	Medium	To Do

2. Detailed Defect Inspection View (BTBSC-1)

Priority: Highest • Severity: Critical

Description: In-depth defect record documenting that spoiler-tagged discussion content is exposed in search previews instead of remaining masked until explicitly revealed by the user.

3. Defect Lifecycle & Resolution Strategy

Engineering Action Plan

Root Cause Analysis: The spoiler masking mechanism is not being applied to search-preview content, allowing spoiler-tagged text to appear without the required protection.

Resolution Plan: Apply the spoiler masking rule to search-preview rendering and ensure spoiler content remains hidden until explicit user interaction. Validate the fix using functional and regression testing.
