

Lab 2: Jira Scrum Project & Sprint Simulation Report

Course: Software Engineering Lab 2 • Problem Statement: Book Club Reading Challenge & Discussion Portal

1. Scrum Project & Sprint Planner Setup

Project: Scrum_BookClub

Description: Initialized a Scrum Software Development project named Scrum_BookClub for the Book Club Reading Challenge & Discussion Portal, setting up the agile backlog and sprint planning workspace.

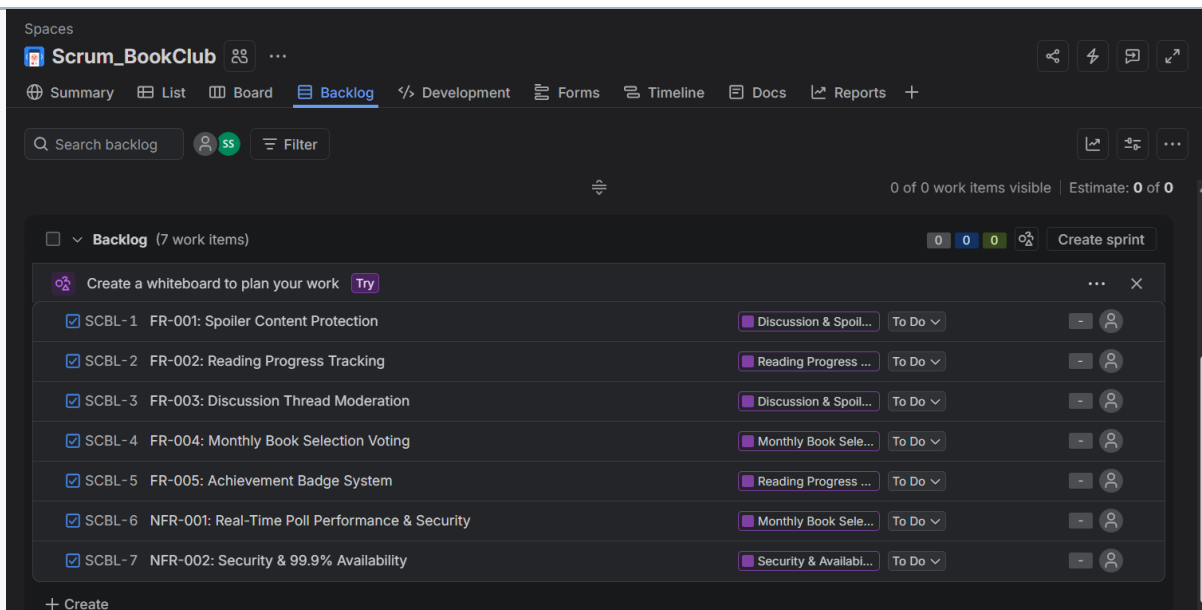

2. Product Backlog with Story Points & Epics

Total Story Points: 29

Description: Populated the product backlog with all 7 requirements (5 FRs + 2 NFRs), mapped to their parent Epics. Assigned relative effort estimates using the Fibonacci scale, totaling 29 story points.

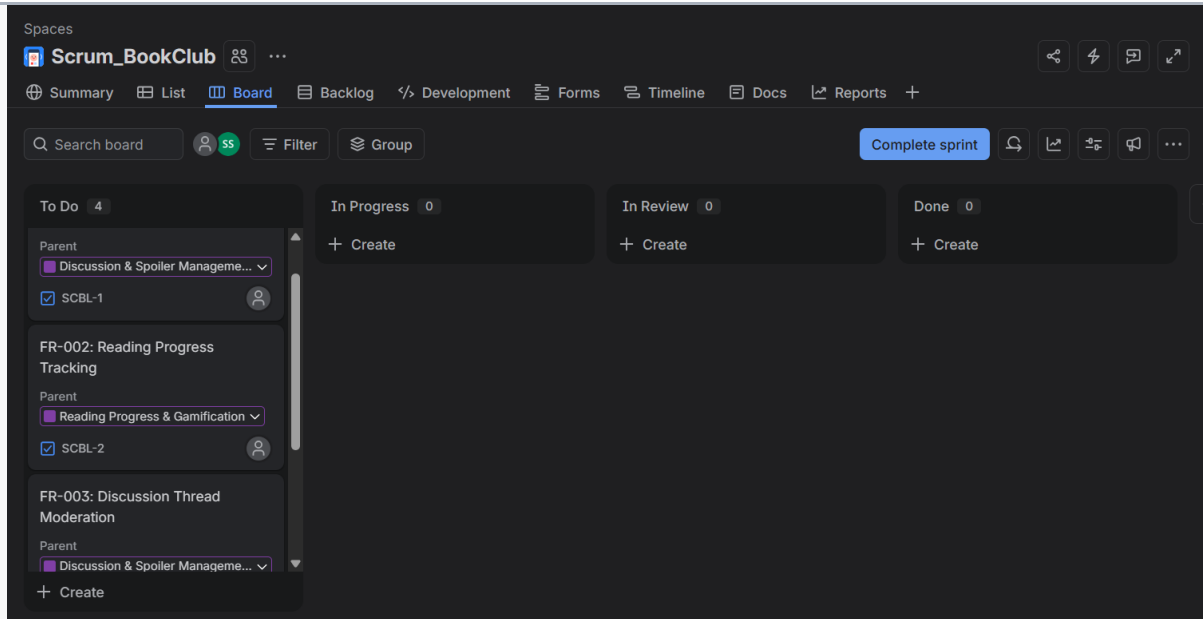

FR-001 5 pts • FR-002 5 pts • FR-003 5 pts • FR-004 5 pts • FR-005 3 pts • NFR-001 3 pts • NFR-002 3 pts.

3. Active Sprint Board (Sprint 1 Simulation)

1-Week Sprint Duration

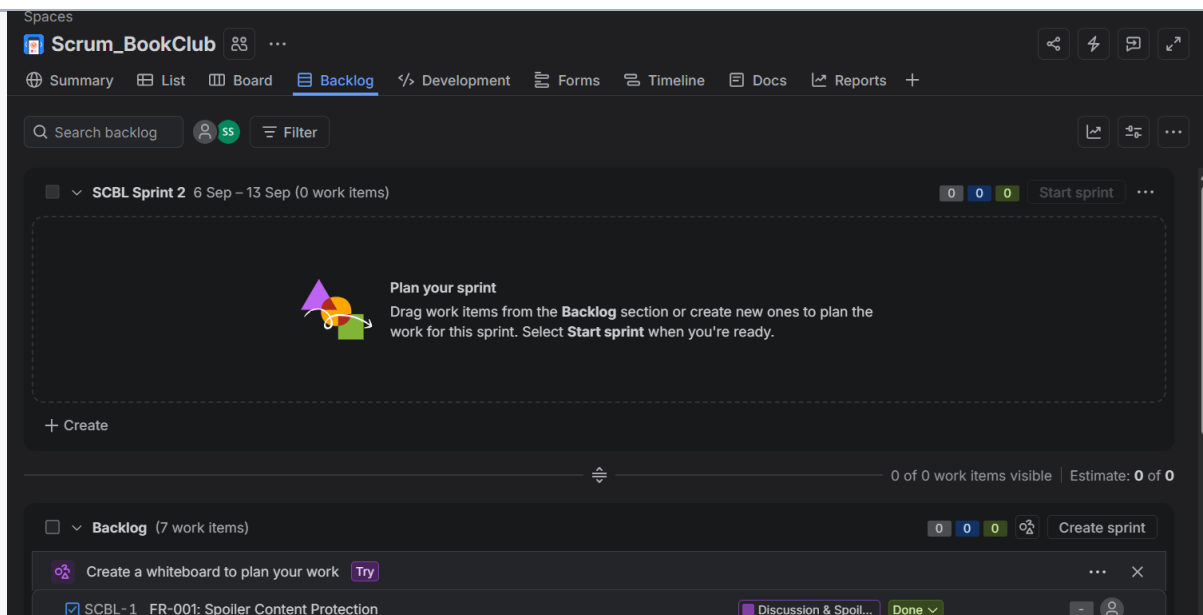

Description: Started Sprint 1 and simulated agile task progression on the Active Sprint board. Advanced FR-001 and FR-002 through IN PROGRESS and completed FR-003 and FR-004 to DONE.

4. Completed Sprint & Backlog Status

Stories Completed & Accepted

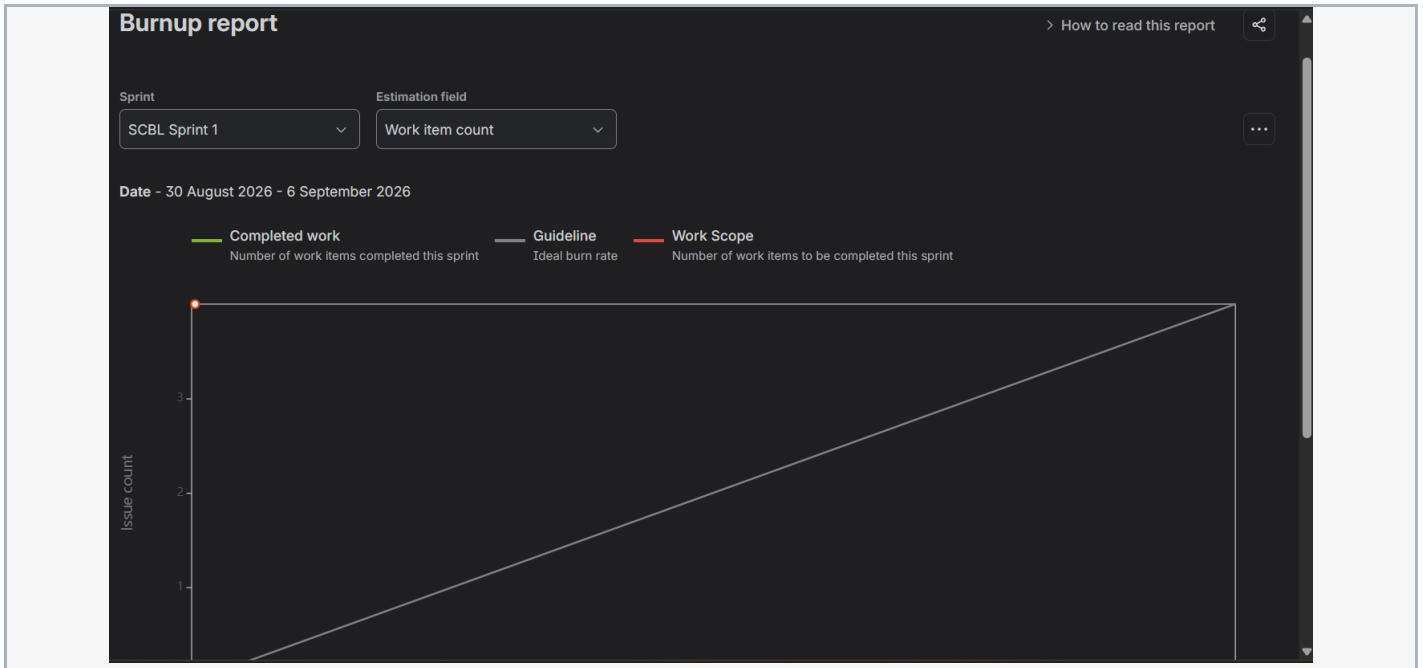

Description: Sprint backlog state reflecting completed work, with Sprint 1 stories transitioning to Done and story points contributing to the cumulative team velocity.

5. Jira Burndown Chart

Sprint Burndown: Remaining Story Points vs. Time

Description: Official Jira Burndown Chart illustrating story point completion across the Sprint 1 timeline. Demonstrates work tracking from the initial 20 committed story points toward zero remaining work.

6. Agile Reflection & Analysis

Lab 2 Post-Sprint Evaluation

Q1: Did your estimations reflect the actual effort?

Yes. Using Fibonacci story points differentiated higher-complexity features such as discussion moderation and reading progress from lower-complexity supporting features such as achievement badges.

Q2: Was your backlog well-prioritized?

Yes. High-priority core functional requirements were prioritized for Sprint 1 because they represent the essential Book Club Portal functionality.

Q3: How did your simulated sprint align with your plan?

The sprint followed the planned 1-week timebox with linear progression from To Do → In Progress → Done, while keeping the Sprint 1 scope focused on core portal functionality.

Q4: What insights did the burndown chart give about your team's capacity?

The burndown chart showed the reduction of remaining story points during the sprint and provided a clear visual indication of sprint progress and team capacity.
